EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jay Finkelstein on September 26, 2005.

The application has been amended as follows:

In the claims:

In claim 2, line 3, "it" has been changed to --said converter--.

The following is an examiner's statement of reasons for allowance: The present invention is directed to an electroacoustic converter. Independent claim 1 identifies the uniquely distinct feature of exciting coil lead wires extending from the exciting coil along the diaphragm and around an outside end of the base cover and electrically connected with a horizontally extending end of each coil contact spring. The closest prior art, Frasi (US 6526152) teaches exciting coil lead wires extending from the exciting coil under the diaphragm and around a guide pin within the base cover and electrically connected with an end of each coil contact spring and Imahori (US 6704430) teaches an electroacoustic converter comprising coil contact springs with horizontally extending ends in electrical contact with contact plates electrically connected to exciting coil lead wires. The prior art fails to anticipate or render the independent claim obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
